

Organizational Structure

San Diego is the nation's fourth (and California's third) most populous county with 2.9 million residents dispersed throughout the County's 4,255 square miles of beaches, coastal canyons, mountains and deserts. Edgemoor is operated and managed by the County's Aging and Independence Services (AIS), an arm of Health & Human Services Agency, which provides more than 300 health and social programs and services that promote well being and quality of life for elderly and disabled San Diegans. Edgemoor's chief executive officer, a hospital administrator, oversees facility operations and has reporting responsibilities to the director of AIS. The Hospital Administrator directly oversees the medical and nursing directors, pharmacy, accounting and personnel manager, plus administrative support staff. The Associate Administrators report directly to the Hospital Administrator and are divided by support and clinical programs. The clinical programs include registered dietitians, licensed social workers, licensed physical, occupational and speech therapists. The Medical Director supervises a staff of four physicians who provide daily medical services to patients, which also include psychological, psychiatric and mental health professional consultants. The Director of Nursing leads the nursing services and supervises over 200 Registered Nurses, Licensed Vocational Nurses and Certified Nurse Assistants.
